Jenner Bariatric

Bariatric porter chair with high weight capacity and reliable back, leg, tilt and rise actions.

Robust and sturdy with a weight capacity of 40 or 50 stone. Reliable BLTR actions gives the user separate control of the chairs functions.

Position control

The heavy duty foot rest of the Jenner chair can be lifted or the whole chair can be tilted back to create an almost flat lying surface.

Seat fabric for pressure relief

Vapour permeable, 4 way stretch fabric on all contact areas aids with pressure relief.

Handset

Separate control of the back, leg, tilt and rise functions giving the user full control.

Standing aid

Use the rise function or raise it vertically by 10cm for ease when standing.
