Evario

Advanced hospital bed for day-to-day care as well as Intensive Care Units.

A variety of control options, safety side systems, castors & head & footboards are brought together to form a practical & attractively versatile hospital bed which addresses individual requirements while still providing excellent value for money.

Safety side

Only requires one hand to swing the side wings down in a quietly cushioned, power assisted motion.

Infection control

Its smooth surface & its optional machine washability contribute to its excellent hygiene characteristics. These support hospitals in the fight against multi-resistant germs.

Supports speedy recovery

Suitable for day-to-day patient care & intensive care. Adjusting the position of the bed to read, eat or get up, promotes the recovery process.

Reliable hygiene

The bed incorporates large smooth surfaces that do not allow dirt to settle unnoticed.
