

Companion

Ultra thin profile alternating surface.

Featuring a patented MicroCell air cell design that provides an ultra thin pressure surface so ensuring the patient's position is not impacted. The PU film air cell bank is fitted into a fully welded waterproof & vapour permeable cover. The pump is easy to use & there are adjustable straps that can easily be fitted to most chairs.

Pressure redistribution

With its ultra-low profile alternating air cells, the Companion supports effective pressure redistribution while seated for extended periods, offloading vulnerable areas.

Plug 'n' play pump

Automatic plug 'n' play pump makes it easy to use & the adjustable straps mean it can be fitted to most chairs hassle free.
